City of Lebanon

Lebanon, Illinois 62254

"City of the Cedars"

Dear Water Customer:

The City Of Lebanon Water Department is required to continue an active cross-connection control program. A cross-connection is any situation that allows a potable (safe) water source and a non-potable (contaminated) water source the opportunity to come into contact with each other. The Illinois Environmental Protection Agency and the Illinois Department of Public Health are responsible for ensuring that cross-connections do not occur through the enforcement of cross-connection control regulations. A cross-connection between potable and non-potable water sources may cause anything from contamination of plumbing to sickness and even death in consumers.

Every two years a survey is required of all customers served by our public water supply. Enclosed is a survey. **A plumber is not needed to fill out this survey.** We are asking you to complete and return the survey to City Hall 312 W.St. Louis Street by July 1, 2016. Simply mark all plumbing fixtures that you have in your home or business. If you have other fixtures that are not listed please mark in the AOther@ spaces.

After we receive your survey we will review the data and determine if an inspection of your plumbing is needed. If it requires an inspection you will be notified by mail to set up an appointment for the inspection.

These surveys are required by the IEPA and must be completed. If the City does not receive your completed survey by the above stated date the City will contact you for a date at which time City Water Personnel will conduct the survey.

We thank you for your cooperation on this matter. If you have any questions please don=t hesitate to call the Water Department at 537-2523 or City Hall 537-4976.

Respectfully,

Penny Pinkstaff
Water Superintendent
