

*"City of the Cedars"*

**CITY OF LEBANON**

Dear Water Customer:

The City of Lebanon Water Department is required to continue an active cross-connection control program. A cross-connection is any situation that allows a potable (safe) water source and non-potable (contaminated) water source the opportunity to come into contact with each other. The Illinois Environmental Protection Agency and the Illinois Department of Public Health are responsible for ensuring that cross-connections do not occur through the enforcement of cross-connection control regulations. A cross-connection between potable and non-potable water sources may cause anything from contamination of plumbing to sickness and even death in consumers.

Every three years a survey is required of all customers served by our police water supply. **A plumber is not needed to fill out this survey.** We are asking you to complete and return the survey to City Hall 312 W. St. Louis St by October 1, 2022. Simply mark all plumbing fixtures that you have in your home or business. If you have any other fixtures that are not listed, please mark in the "Other" spaces.

After we receive your survey, we will review the data and determine if an inspection of your plumbing is needed. If it requires inspection, you will be notified by mail to set up an appointment for the inspection.

These surveys are required by the IEPA and must be completed. If the City does not receive your survey by the above date the city will contact you for a date at which time a City Water Personnel will conduct the survey.

We thank you for your cooperation on this matter. If you have any questions, please don't hesitate to contact the Water Department at City Hall 537-4976.

Respectfully,

Penny Pinkstaff/Zimmerman  
Water Superintendent
