

# Service Line Material Identification

The Illinois Environmental Protection Agency recently revised the lead and copper rule for community drinking water, requiring municipalities to gather and update water service line material information for all structures connected to the distribution system. Participation from water customers is essential for completing this inventory and the City of Lebanon Water Department is asking for your help. Please return this form with your name, address, and whether you have a lead, galvanized steel, copper, or plastic service line and year home was built, to City Hall 312 W St Louis St Lebanon IL 62254. If you have questions regarding this inventory, please call Penny at 618-977-7910.

## **PLEASE IDENTIFY AT THE ENTRY POINT TO THE HOME**

### **Material details for identification**

**Lead** • Grey in color. • Non-magnetic • Soft metal, easy to mark • Connections resemble a bulb shape.

**Galvanized Steel** • Silver/grey in color. • Magnetic • May observe red/rusty areas.

**Copper** • Similar color and shine of a Penny. • May have green and blue coloration. • Non-magnetic

**Plastic** • Blue or black in color. • Lettering or stripes may be imprinted on the pipe

1. Lead
2. Galvanized Steel (Iron)
3. Copper
4. Plastic (Black/Blue Color)
